

INNER AND OUTER HARMONY

GENTLE AESTHETIC MEDICINE

At our Centre of Aesthetic Medicine, we apply a holistic concept of medicine for beauty that does more than eliminate cosmetic flaws; it generates joy in life and a positive self-perception. In addition to the correction of aesthetic problems, the special treatments have regenerative effects: They stimulate the production of collagen, repair damaged blood vessels and strengthen the skin's own regenerative mechanisms.

All treatments are painless and are mostly based on natural substances.
